

# Anna's ssh command

```
ssh -i key.pem -Y ubuntu@115.146.84.207
```

# Question 1

Using the 'man' command, what is the -Y flag adding to the ssh command?

- A) Forces ssh into loud mode
- B) Specifies the user to log in as on the remote machine
- C) Enables trusted X11 forwarding
- D) Asks ssh to display the version number and exit
- E) Forces ssh into quiet mode

?
