

A line infection checklist

- ☐ wash hands with soap,
- ☐ clean the patient's skin with chlorhexidine antiseptic,
- ☐ put sterile drapes over the entire patient,
- ☐ put on a sterile mask, hat, gown, and gloves,
- ☐ put a sterile dressing over the catheter site once the line is in

Question 1

When do I lose my IP number?

- A. When I do a soft reboot on my VM
- B. When I terminate my VM
- C. When I pause my VM
- D. When I stop my VM
- E. When I do a hard reboot on my VM

Question 2

I change the rules in a security group by removing port 80 (http). Mysteriously a web server on another VM in the project stops “working”. Could it be because:

- A. The security group was shared with the other machine
- B. The web server inexplicably broke
- C. The other machine itself failed
- D. NeCTAR are experiencing a network problem
- E. All of the above...
